PROFILE

PhD fellow of the Horizon 2020-Marie Skłodowska-Curie Actions-COFUND European program AI4TheSciences at Mines Paris – PSL University (Paris, France). My current focus is the application of Deep Learning and Computer Vision techniques to medical images for the developing of computer-aided surgery planning based on State-of-The-Art technologies, such as Vision Transformers, Segment Anything Model, Convolution Neural Networks. While pursuing my master's degree, I was awarded a scholarship for a Double Master's Degree program between Italy and Spain, conducting a thesis on DL and CV applied to autonomous driving (3D depth completion and object detection).
